CHAPTER 45

INTELLIGENCE SPECIALIST (IS)

NAVPERS 18068-45E

Updated: July 2011

TABLE OF CONTENTS
INTELLIGENCE SPECIALIST (IS)

NAVY ENLISTED OCCUPATIONAL STANDARD

FOR

INTELLIGENCE SPECIALIST (IS)

SCOPE OF RATING

Intelligence Specialists (IS) assist in every phase of the planning, collection, processing, analysis, and dissemination of intelligence information; assemble and analyze multi-source operational intelligence in support of all warfare areas; assist in support of intelligence briefings, reporting, and analytical programs; prepare and present intelligence briefings; prepare material for use in mission planning; prepare graphics (annotated photographs, plot sheets, mosaics, overlays, etc.); plot and prepare multi-sensor imagery; draft intelligence reports; provide input to and receive data from computerized intelligence systems, ashore and afloat; and maintain intelligence files (photographs, maps, charts, photographic interpretation keys, etc.) and libraries.

_____

These Occupational Standards are to be incorporated in Volume I, Part B, of the Manual of Navy Enlisted Manpower and Personnel Classifications and Occupational Standards (NAVPERS 18068F) as Chapter 45.

```
Normal path of advancement to Chief Warrant Officer and Limited Duty Officer categories can be found in OPNAVINST 1420.1.

For rating entry requirements, refer to MILPERSMAN 1306-618.

SAFETY
The observance of proper safety precautions in all areas is an integral part of each billet and the responsibility of every Sailor; therefore, it is a universal requirement for all ratings.

Job Title				**Job Code**

Job Family	**NOC**	**Short Title (30 Characters)**	**Short Title (10 Characters)**
Architecture and Engineering	TBD	STRIKE ANALYST	STRIKE AN

Pay Plan	**Career Field**	**Other Relationships and Rules**
Enlisted	IS	NEC 3923

Job Description

Strike Analysts conduct tactical intelligence research, analysis, and dissemination in support of Strike Warfare (STW) operations; fuse multi-source data into textual and graphical presentations of the battlefield and operational area to support contingency operations around the world; provide targeting support utilizing both the Precision Targeting Workstation (PTW) and Common Geopositioning Services (CGS) in support of Navy Precision Guided Munitions (PGM) STW; integrate operational and environmental intelligence information to strike mission planners, providing critical target intelligence and maintaining tactical level targeting products; produce precise navigational products for use by PGM, Joint Stand-Off Weapon (JSOW), and Stand-Off Land Attack Missile-Expanded Response   (SLAM-ER); provide targeting support at the theater-level in support of the functional component commander; assist in managing the afloat targeting process, including target development, analytic review of advanced weapons and advanced collateral damage estimation scenarios, imagery collection and exploitation, and quality control of precise geo-positioning in support of targeting; and provide leadership for the training and standardization of targeting support throughout the fleet.

Architecture and Engineering	TBD	IMAGERY INTEL ANALYST	IMINTEL AN

Pay Plan	**Career Field**	**Other Relationships and Rules**
Enlisted	IS	NEC 3910

Job Description

Imagery Intelligence Analysts exploit imagery derived from multiple sources; detect, identify and report on significant military, industrial, resource, or topographical data; use soft-copy imagery interpretation and manipulation skills and operate soft-copy imagery exploitation systems to identify and locate enemy positions, camouflaged military installations, lines-of-communication, strategic industries, rivers, and urban areas; use images to conduct Joint Intelligence Preparation of the Battlespace (JIPB), perform Bomb Hit Assessment and Battle Damage Assessment (BHA / BDA) and prepare formatted imagery interpretation reports; maintain and refer to publications in support of installation and platform identification; categorize and measure objects of intelligence interest found on imagery and apply the National Imagery Interpretability Rating Scale (NIIRS) to determine image quality; interpret all-source imagery using advanced exploitation processes and applications; identify and analyze various Orders-Of-Battle (OOB) to include Tables of Organization and Equipment (TO&E); apply knowledge of literal and non-literal imagery exploitation analysis to detect, discriminate, identify, quantify, and predict activity utilizing spectral Measurement and Signal Intelligence (MASINT) and geospatial information applications; analyze imagery to evaluate activity affecting military operations to include environmental analysis, civilian population restraints, enemy force strength, and to predict military intentions; perform imagery product review, quality assurance, research, digital imagery ordering and receipt, exploitation, disseminate and assess releasability requirements; and use elements of the Joint Service Imagery Processing System- Navy (JSIPS-N), Distributed Common Ground System-Navy (DCGS-N), the Joint Concentrator Architecture (JCA) including the Precision Targeting Workstation (PTW) and the Image Product Library (IPL) for imagery and image product management.
